## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 3, 6, 9, and 10 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent claim 3 sets forth an automotive knuckle comprising an inner surface, a bottom portion, a fitting hole for a wheel bearing, a through hole opened in the inner surface of the fitting hole, and an open end portion of the through hole that has a contour shaped nearly like an ellipsoid having a major axis and a minor axis.

The closest prior art of record is Applicant's Admitted Prior Art, as discussed in the office action filed on 9 February 2006. Applicant's Admitted Prior Art does not disclose the critical feature of Applicant's invention of an open end portion of the through hole having a contour shaped nearly like an ellipsoid having a major axis and a minor axis. The criticality of this feature is discussed at length in applicant's disclosure (page 3, line 19 to page 4, line 8, and page 6, line 2 to page 7, line 2). The ellipsoid contour can only be created by the method as disclosed by the applicant; all of the prior art methods create a contour that is a spheroid.

Furthermore, there is no combinable teaching in the prior art of record that would reasonably motivate one having ordinary skill in the art to so modify the teachings of the prior art, and thus, for at least the foregoing reasoning, the prior of record does not render obvious the present invention as set forth in independent claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
